

## Smarter Lunchrooms Scorecard Literature Review

Researchers from many universities and countries have published papers that focus on encouraging children to select and eat nutritious food, which corroborate and strengthen the behavioral research that is the foundation of the Smarter Lunchrooms Movement. Some of this research is included below.

### Focus on Fruit:

- **At least two kinds of fruit are offered.**
  - Serving a variety of vegetables and fruit as a snack increased intake in preschool children
    - Roe, L. S., Meengs, J. S., Birch, L. L., & Rolls, B. J. (2013). Serving a variety of vegetables and fruit as a snack increased intake in preschool children. *The American journal of clinical nutrition*, 98(3), 693-699.
  - Increasing Consumption of Fruits and Vegetables in the School Cafeteria: The Influence of Active Choice.
    - Hakim, S. M. and G. Meissen. (2013) "Increasing Consumption of Fruits and Vegetables in the School Cafeteria: The Influence of Active Choice." *Journal of Health Care for the Poor and Underserved*, 24(2): 145-157.
- **Sliced or cut fruit is offered.**
  - Promoting consumption of fruit in elementary school cafeterias. The effects of slicing apples and oranges
    - Swanson, M., Branscum, A., & Nakayima, P. J. (2009). Promoting consumption of fruit in elementary school cafeterias. The effects of slicing apples and oranges. *Appetite*, 53(2), 264-267.
  - Childhood overweight and the relationship between parent behaviors, parenting style, and family functioning
    - Rhee, K. (2008). Childhood overweight and the relationship between parent behaviors, parenting style, and family functioning. *The ANNALS of the American Academy of Political and Social Science*, 615(1), 11-37.
  - Psychosocial correlates of dietary intake: advancing dietary intervention
    - Baranowski, T., Cullen, K. W., & Baranowski, J. (1999). Psychosocial correlates of dietary intake: advancing dietary intervention. *Annual review of nutrition*, 19(1), 17-40.
  - How to promote fruit consumption in children. Visual appeal versus restriction
    - Jansen, E., Mulkens, S., & Jansen, A. (2010). How to promote fruit consumption in children. Visual appeal versus restriction. *Appetite*, 54(3), 599-602.
- **A variety of mixed whole fruits are displayed in nice bowls or baskets (instead of stainless steel pans).**
  - How to promote fruit consumption in children. Visual appeal versus restriction
    - Jansen, E., Mulkens, S., & Jansen, A. (2010). How to promote fruit consumption in children. Visual appeal versus restriction. *Appetite*, 54(3), 599-602.

- **Fruit is offered in at least two locations on all service lines, one of which is right before each POS.**
  - Determinants of fruit and vegetable consumption among 6–12-year-old children and effective interventions to increase consumption
    - Blanchette, L., & Brug, J. (2005). Determinants of fruit and vegetable consumption among 6–12-year-old children and effective interventions to increase consumption. *Journal of human nutrition and dietetics*, 18(6), 431-443.
  - Influencing healthful food choices in school and home environments: Results from the TEENS study
    - Lytle, L. A., Kubik, M. Y., Perry, C., Story, M., Birnbaum, A. S., & Murray, D. M. (2006). Influencing healthful food choices in school and home environments: results from the TEENS study. *Preventive medicine*, 43(1), 8-13.
- **At least one fruit is identified as the featured fruit-of-the-day and is labeled with a creative, descriptive name at the point of selection.**
  - Choosing between an Apple and a Chocolate Bar: the Impact of Health and Taste Labels
    - Forwood, S. E., Walker, A. D., Hollands, G. J., & Marteau, T. M. (2013). Choosing between an apple and a chocolate bar: the impact of health and taste labels. *PloS one*, 8(10), e77500.
  - Emerald dragon bites vs veggie beans: Fun food names increase children’s consumption of novel healthy foods
    - Musher-Eizenman, D. R., Oehlhof, M. W., Young, K. M., Hauser, J. C., Galliger, C., & Sommer, A. (2011). Emerald dragon bites vs veggie beans: Fun food names increase children’s consumption of novel healthy foods. *Journal of Early Childhood Research*, 9(3), 191-195.
- **A fruit taste test is offered at least once a year.**
  - A Garden Pilot Project Enhances Fruit and Vegetable Consumption among Children
    - Heim, S., Stang, J., & Ireland, M. (2009). A garden pilot project enhances fruit and vegetable consumption among children. *Journal of the American Dietetic Association*, 109(7), 1220-1226.
  - Parent food purchases as a measure of exposure and preschool-aged children's willingness to identify and taste fruit and vegetables
    - Busick, D. B., Brooks, J., Pernecky, S., Dawson, R., & Petzoldt, J. (2008). Parent food purchases as a measure of exposure and preschool-aged children's willingness to identify and taste fruit and vegetables. *Appetite*, 51(3), 468-473.

### **Vegetable Variety:**

- **At least two kinds of vegetables are offered.**
  - Vegetable variety: an effective strategy to increase vegetable choice in children
    - Bucher, T., Siegrist, M., & van der Horst, K. (2014). Vegetable variety: an effective strategy to increase vegetable choice in children. *Public health nutrition*, 17(6), 1232-1236.

- **Vegetables are offered on all service lines.**
  - Influencing healthful food choices in school and home environments: Results from the TEENS study
    - Lytle, L. A., Kubik, M. Y., Perry, C., Story, M., Birnbaum, A. S., & Murray, D. M. (2006). Influencing healthful food choices in school and home environments: results from the TEENS study. *Preventive medicine*, 43(1), 8-13.
  - Determinants of fruit and vegetable consumption among 6–12-year-old children and effective interventions to increase consumption
    - Blanchette, L., & Brug, J. (2005). Determinants of fruit and vegetable consumption among 6–12-year-old children and effective interventions to increase consumption. *Journal of human nutrition and dietetics*, 18(6), 431-443.
- **Hot and cold vegetables are offered.**
  - Improvement of meal composition by vegetable variety
    - Bucher, T., van der Horst, K., & Siegrist, M. (2011). Improvement of meal composition by vegetable variety. *Public health nutrition*, 14(08), 1357-1363.3
  - Vegetable variety: an effective strategy to increase vegetable choice in children
    - Bucher, T., Siegrist, M., & van der Horst, K. (2014). Vegetable variety: an effective strategy to increase vegetable choice in children. *Public health nutrition*, 17(6), 1232-1236.
- **At least one vegetable is identified as the featured vegetable-of-the-day and is labeled with a creative, descriptive name at the point of selection.**
  - Emerald dragon bites vs veggie beans: Fun food names increase children’s consumption of novel healthy foods
    - Musher-Eizenman, D. R., Oehlhof, M. W., Young, K. M., Hauser, J. C., Galliger, C., & Sommer, A. (2011). Emerald dragon bites vs veggie beans: Fun food names increase children’s consumption of novel healthy foods. *Journal of Early Childhood Research*, 9(3), 191-195.
- **Self-serve spices and seasonings are available for students to add flavor to vegetables.**
  - Changes in the Nutrient Content of School Lunches: Results from the CATCH Eat Smart Food Service Intervention
    - Osganian, S. K., Ebzery, M. K., Montgomery, D. H., Nicklas, T. A., Evans, M. A., Mitchell, P. D., ... & Bachman, K. J. (1996). Changes in the nutrient content of school lunches: results from the CATCH Eat Smart Food service Intervention. *Preventive Medicine*, 25(4), 400-412.
- **A serving of vegetables is incorporated into an entrée item at least once a month.**
  - Improvement of meal composition by vegetable variety
    - Bucher, T., van der Horst, K., & Siegrist, M. (2011). Improvement of meal composition by vegetable variety. *Public health nutrition*, 14(08), 1357-1363.3
  - Vegetable variety: an effective strategy to increase vegetable choice in children
    - Bucher, T., Siegrist, M., & van der Horst, K. (2014). Vegetable variety: an effective strategy to increase vegetable choice in children. *Public health nutrition*, 17(6), 1232-1236.

- **Cut vegetables, when offered, are paired with a low-fat dip such as ranch, hummus, or salsa.**
  - Offering “Dip” Promotes Intake of a Moderately-Liked Raw Vegetable among Preschoolers with Genetic Sensitivity to Bitterness
    - Fisher, J. O., Mennella, J. A., Hughes, S. O., Liu, Y., Mendoza, P. M., & Patrick, H. (2012). Offering “dip” promotes intake of a moderately-liked raw vegetable among preschoolers with genetic sensitivity to bitterness. *Journal of the Academy of Nutrition and Dietetics*, 112(2), 235-245.
  - The Addition of a Plain or Herb-Flavored Reduced-Fat Dip Is Associated with Improved Preschoolers' Intake of Vegetables
    - Savage, J. S., Peterson, J., Marini, M., Bordi, P. L., & Birch, L. L. (2013). The addition of a plain or herb-flavored reduced-fat dip is associated with improved preschoolers' intake of vegetables. *Journal of the Academy of Nutrition and Dietetics*, 113(8), 1090-1095.
- **A vegetable taste test is offered at least once a year.**
  - Repeated taste exposure increases liking for vegetables by low-income elementary school children
    - Lakkakula, A., Geaghan, J., Zanovec, M., Pierce, S., & Tuuri, G. (2010). Repeated taste exposure increases liking for vegetables by low-income elementary school children. *Appetite*, 55(2), 226-231.
  - A Garden Pilot Project Enhances Fruit and Vegetable Consumption among Children
    - Heim, S., Stang, J., & Ireland, M. (2009). A garden pilot project enhances fruit and vegetable consumption among children. *Journal of the American Dietetic Association*, 109(7), 1220-1226.
  - Parent food purchases as a measure of exposure and preschool-aged children's willingness to identify and taste fruit and vegetables
    - Busick, D. B., Brooks, J., Pernecky, S., Dawson, R., & Petzoldt, J. (2008). Parent food purchases as a measure of exposure and preschool-aged children's willingness to identify and taste fruit and vegetables. *Appetite*, 51(3), 468-473.

## Salad:

- **Pre-packaged salads or a salad bar is available.**
  - Salad Bars and Fruit and Vegetable Consumption in Elementary Schools: A Plate Waste Study
    - Adams, M. A., Pelletier, R. L., Zive, M. M., & Sallis, J. F. (2005). Salad bars and fruit and vegetable consumption in elementary schools: a plate waste study. *Journal of the American Dietetic Association*, 105(11), 1789-1792.
- **Self-serve salad bar tongs, scoops, and containers are larger for vegetables and smaller for croutons, dressing, and other non-produce items.**
  - Can schools save kids' palates? Cooking from scratch in schools—The greatest food service challenge of our time
    - Collins, B. (2012). Can schools save kids' palates? Cooking from scratch in schools—The greatest food service challenge of our time. *Childhood Obesity (Formerly Obesity and Weight Management)*, 8(4), 323-326.

- **Pre-packaged salads or a salad bar is in a high traffic area and is available to all students.**
  - Location of school lunch salad bars and fruit and vegetable consumption in middle schools: A cross-sectional plate waste study
    - Adams, M. A., Bruening, M., Ohri-Vachaspati, P., & Hurley, J. C. (2016). Location of school lunch salad bars and fruit and vegetable consumption in middle schools: A cross-sectional plate waste study. *Journal of the Academy of Nutrition and Dietetics*, 116(3), 407-416.
  - Salad Bars and Fruit and Vegetable Consumption in Elementary Schools: A Plate Waste Study
    - Adams, M. A., Pelletier, R. L., Zive, M. M., & Sallis, J. F. (2005). Salad bars and fruit and vegetable consumption in elementary schools: a plate waste study. *Journal of the American Dietetic Association*, 105(11), 1789-1792.
- **Pre-packaged salads or salad bar choices are labeled with creative, descriptive names and displayed next to each choice.**
  - Salad Bars and Fruit and Vegetable Consumption in Elementary Schools: A Plate Waste Study
    - Adams, M. A., Pelletier, R. L., Zive, M. M., & Sallis, J. F. (2005). Salad bars and fruit and vegetable consumption in elementary schools: a plate waste study. *Journal of the American Dietetic Association*, 105(11), 1789-1792.
  - Location of school lunch salad bars and fruit and vegetable consumption in middle schools: A cross-sectional plate waste study
    - Adams, M. A., Bruening, M., Ohri-Vachaspati, P., & Hurley, J. C. (2016). Location of school lunch salad bars and fruit and vegetable consumption in middle schools: A cross-sectional plate waste study. *Journal of the Academy of Nutrition and Dietetics*, 116(3), 407-416.

### **Move More White Milk:**

- **Milk cases/coolers kept full throughout meal service.**
  - The nutritional role of flavored and white milk in the diets of children
    - Nicklas, T. A., O'Neil, C. E., & Fulgoni, V. L. (2013). The nutritional role of flavored and white milk in the diets of children. *Journal of School Health*, 83(10), 728-733.
- **White milk is offered in all beverage coolers.**
  - The nutritional role of flavored and white milk in the diets of children
    - Nicklas, T. A., O'Neil, C. E., & Fulgoni, V. L. (2013). The nutritional role of flavored and white milk in the diets of children. *Journal of School Health*, 83(10), 728-733.
- **White milk is displayed in front of other beverages in all coolers.**
  - The nutritional role of flavored and white milk in the diets of children
    - Nicklas, T. A., O'Neil, C. E., & Fulgoni, V. L. (2013). The nutritional role of flavored and white milk in the diets of children. *Journal of School Health*, 83(10), 728-733.
  - School Children's Consumption of Lower-Calorie Flavored Milk: A Plate Waste Study
    - Yon, B. A., Johnson, R. K., & Stickle, T. R. (2012). School children's consumption of lower-calorie flavored milk: a plate waste study. *Journal of the Academy of Nutrition and Dietetics*, 112(1), 132-136.

- **White milk is organized and represents at least 1/3 of all milk in each designated milk cooler.**
  - The nutritional role of flavored and white milk in the diets of children
    - Nicklas, T. A., O'Neil, C. E., & Fulgoni, V. L. (2013). The nutritional role of flavored and white milk in the diets of children. *Journal of School Health*, 83(10), 728-733.
  - School Children's Consumption of Lower-Calorie Flavored Milk: A Plate Waste Study
    - Yon, B. A., Johnson, R. K., & Stickle, T. R. (2012). School children's consumption of lower-calorie flavored milk: a plate waste study. *Journal of the Academy of Nutrition and Dietetics*, 112(1), 132-136.
- **1% or non-fat white milk is identified as the featured milk and is labeled with a creative, descriptive name.**
  - The nutritional role of flavored and white milk in the diets of children
    - Nicklas, T. A., O'Neil, C. E., & Fulgoni, V. L. (2013). The nutritional role of flavored and white milk in the diets of children. *Journal of School Health*, 83(10), 728-733.
  - School Children's Consumption of Lower-Calorie Flavored Milk: A Plate Waste Study
    - Yon, B. A., Johnson, R. K., & Stickle, T. R. (2012). School children's consumption of lower-calorie flavored milk: a plate waste study. *Journal of the Academy of Nutrition and Dietetics*, 112(1), 132-136.

### **Increase Sales of Reimbursable Meals:**

- **Cafeteria staff politely prompt students who do not have a full reimbursable meal to select a fruit or vegetable.**
  - A Randomized School Trial of Environmental Strategies to Encourage Fruit and Vegetable Consumption among Children
    - Perry, C. L., Bishop, D. B., Taylor, G. L., Davis, M., Story, M., Gray, C., ... & Harnack, L. (2004). A randomized school trial of environmental strategies to encourage fruit and vegetable consumption among children. *Health education & behavior*, 31(1), 65-76.
  - The influence of a verbal prompt on school lunch fruit consumption: a pilot study
    - Schwartz, M. B. (2007). The influence of a verbal prompt on school lunch fruit consumption: a pilot study. *International Journal of Behavioral Nutrition and Physical Activity*, 4(1), 6.
- **One entrée is identified as the featured entrée-of-the-day, is labeled with a creative name next to the point of selection, and is the first entrée offered.**
  - Choosing between an Apple and a Chocolate Bar: the Impact of Health and Taste Labels
    - Forwood, S. E., Walker, A. D., Hollands, G. J., & Marteau, T. M. (2013). Choosing between an apple and a chocolate bar: the impact of health and taste labels. *PLoS one*, 8(10), e77500.
  - Emerald dragon bites vs veggie beans: Fun food names increase children's consumption of novel healthy foods
    - Musher-Eizenman, D. R., Oehlhof, M. W., Young, K. M., Hauser, J. C., Galliger, C., & Sommer, A. (2011). Emerald dragon bites vs veggie beans: Fun food names increase

children's consumption of novel healthy foods. *Journal of Early Childhood Research*, 9(3), 191-195.

- **Creative, descriptive names are used for featured items on the monthly menu.**
  - Choosing between an Apple and a Chocolate Bar: the Impact of Health and Taste Labels
    - Forwood, S. E., Walker, A. D., Hollands, G. J., & Marteau, T. M. (2013). Choosing between an apple and a chocolate bar: the impact of health and taste labels. *PloS one*, 8(10), e77500.
  - Emerald dragon bites vs veggie beans: Fun food names increase children's consumption of novel healthy foods
    - Musher-Eizenman, D. R., Oehlhof, M. W., Young, K. M., Hauser, J. C., Galliger, C., & Sommer, A. (2011). Emerald dragon bites vs veggie beans: Fun food names increase children's consumption of novel healthy foods. *Journal of Early Childhood Research*, 9(3), 191-195.
- **One reimbursable meal is identified as the featured combo meal and is labeled with a creative name like The Chef's Feast, The Athlete's Meal, or The Brain Boosting Meal next to the point of selection.**
  - Choosing between an Apple and a Chocolate Bar: the Impact of Health and Taste Labels
    - Forwood, S. E., Walker, A. D., Hollands, G. J., & Marteau, T. M. (2013). Choosing between an apple and a chocolate bar: the impact of health and taste labels. *PloS one*, 8(10), e77500.
  - Emerald dragon bites vs veggie beans: Fun food names increase children's consumption of novel healthy foods
    - Musher-Eizenman, D. R., Oehlhof, M. W., Young, K. M., Hauser, J. C., Galliger, C., & Sommer, A. (2011). Emerald dragon bites vs veggie beans: Fun food names increase children's consumption of novel healthy foods. *Journal of Early Childhood Research*, 9(3), 191-195.
- **Signs show students how to make a reimbursable meal on any service line (for example, a sign that says "Add a milk, fruit and carrots to your pizza for the Power Pizza Meal Deal!")**
  - Signage as a tool for behavioral change: Direct and indirect routes to understanding the meaning of a sign
    - Meis, J., & Kashima, Y. (2017). Signage as a tool for behavioral change: Direct and indirect routes to understanding the meaning of a sign. *PloS one*, 12(8), e0182975.
- **The combo meal of the day or featured entrée-of-the-day is displayed on a sample tray or photograph.**
  - Photographs in Lunch Tray Compartments and Vegetable Consumption Among Children in Elementary School Cafeterias
    - Reicks, M., Redden, J. P., Mann, T., Mykerezzi, E., & Vickers, Z. (2012). Photographs in lunch tray compartments and vegetable consumption among children in elementary school cafeterias. *Jama*, 307(8), 784-785.
